

CLAIMS

Sub C12

1. In an embossed card package production apparatus having means for producing cards from stored card information and means for inserting the cards into card carrying mailing forms, the improvement being a verification system, comprising:

means for determining when a card has been incorrectly prepared; and

means for preventing an incorrectly prepared card from being inserted into a carrier.

2. The embossed card package production apparatus of claim 1 in which the determining means including means for comparing information on the card with stored card information used to produce the card.

3. The embossed card production system of claim 2 in which the determining means compares embossed information read from the card to the stored card information.
